

The diagram illustrates the Node model hierarchy. At the top is a dashed line labeled "Node model". Below it is a box labeled "SpecificParameter : Rule call". A solid line connects this box to a box labeled "{IntParameter} : Action". From the bottom of the "{IntParameter} : Action" box, three lines branch out to three boxes at the bottom: "IntParameter : Rule call", a small gray box, and "'int'".

```
graph TD; NodeModel[Node model] -.- SpecificParameter[SpecificParameter : Rule call]; SpecificParameter --- IntParameterSet["{IntParameter} : Action"]; IntParameterSet --- IntParameter["IntParameter : Rule call"]; IntParameterSet --- GrayBox[ ]; IntParameterSet --- IntString["'int'"];
```

```
graph TD; AST[AST] -.-> SP[SpecificParameter : Rule call]; SP --> IP[IntParameter : Rule call]; IP --> I[int];
```
